Construction Management

As the Construction Manager, Sweetwater worked with the Design Team of Mancini Duffy and Philip Kennedy Grant to expand the Clubhouse. The addition included a 14,000 square-foot Ballroom and expanded food service to support the Club's increased banquet capacity. Highlights of the building addition included an exterior accented with roof cornices, glass atrium, chandeliers, and French doors to terraces that overlook the 18th green of the Banks course. Sweetwater worked with the Team, managing the schedule and logistics to minimize disruption of the Club's daily operation during the summer. The 10,000 square-foot maintenance facility houses the Golf Club, storage and repair facilities.
