Trenton, NJ
- ARCHITECT:
Saphire & Albarran, LLC
Pennington, NJ
- SERVICES:
General Contracting

Sweetwater completed the conversion of 2 small offices and a storage room into the gift shop. The project included demolition, then the repair of existing terracotta walls and patching of existing terrazzo flooring. Entrance doors and millwork were designed to lay flat on corridor wall when open as to look like complete millwork panels. Scope included all counter, millwork and lighting, as well as plumbing and electrical elements.

An inpatient dialysis unit was recently constructed by Sweetwater on the 3rd floor, to accommodate 4 stations, a nurse's desk and waiting area. The 700 square-foot space also included lavatory and storage.
