

# Genzyme Biosurgery Aseptic Gowning & Corridor

Ridgefield, New Jersey

- Genzyme Corporation (a Sanofi company)  
Ridgefield, NJ
- Manufacturing (compliance program)
- General Contracting
- Construction started October 2014
- Construction completed January 2015
- Phased technical conversion of existing GMP warehouse into an aseptic gowning area with lockers and rest rooms.
- 8,400 square feet

## Challenge:

Perform a significant site improvement pharma/bio-tech renovation for a corporation that demands high standards for all operations. This highly-technical, compliance renovation, in an active cGMP warehouse, required careful and exact planning for noise, contamination, multiple shifts, audits, and production schedules. Sweetwater was required to be safety certified by ISNetworld® and maintain subcontractors of high safety standards as well.

## Highlights included:

- Merit Shop
- 4,600 sf steel platform field-built prior to project to house Building Management System, UPS & switchgear
- Concurrent projects were performed to provide critical support systems. Overtime and weekends to keep schedule
- Tight supervision and synchronization of trades
- Provided a custom, detailed weekly progress report to the client for the length of the project
- 0 DART and no safety infractions
